

Natural or certified organic ingredients

- 96,1% natural ingredients / 100% vegan ingredients
- Without synthetic/essential perfume
- Based on natural plant fibres and colour pigments
- Coloured hair powder to create a fuller appearance, cover up thinning areas or an outgrowth
- Professional haircare that cares about your health and environment

Coloured hair powder made of natural plant fibres and colour pigments that blend with your own hair, making it look fuller and thicker. Thousands of tiny plant fibres are charged with static electricity and act as magnets, settle around the cuticle and visually create more volume, hide the lack of hair growth or cover outgrowth.

The hair powder is easy to use, economical in use and available in 3 different colours. You can mix different colours to match your own hair colour perfectly.

Without synthetic/essential perfume and therefore ideal for pregnant women and scent-sensitive people.

USE: Apply on clean, dry hair. Sprinkle the fibres in the hair and work it in with your fingertips until the desired result is achieved. Finish with Zenz Volume Fixing Spray or Zenz Hair Spray no. 86 or 88 to fix the fibres and to achieve a lasting result, so the hair looks fuller throughout the day. The plant fibres are easily washed out of the hair when washing with regular shampoo. The hair powder can be combined with other styling products. Use the powder first, then styling product, for example styling wax, and finish with hair spray.

INGREDIENTS: Plant resinous fiber, keratin derivative, antistatic agent, ammonium bicarbonate, CI 15985, CI 42090, CI 16185.

Vegan ingredients.

UDDYBENDE INFORMATION OM INGREDIENSER

Plant resinous fiber

Natural origin (plant-derived). Mainly extracts from pine and cedar.

Keratin derivative

Natural origin. Extracts from corn. Makes fibers more similar to real human hair.

Antistatic agent

Synthetic origin. Used to enable fibers to attach to existing hair.

Ammonium bicarbonate

Synthetic origin. Inorganic salt. Makes fibers softer and more flexible.

CI 15985, CI 42090, CI 16185

Natural origin (mineral-based). Cosmetic colourant.
