- Without synthetic/essential perfume
- 100% pure minerals
- Natural SPF 15
- Non-comodogenic
- Professional mineral make-up - a healthy choice

Zenz mineral bronzer and blush are loose powder made of 100% pure top grade minerals. Helps to nourish the skin and gives a natural flawless look. Absorbs quickly into the skin and feels comfortable while providing a uniform coverage and “soft focused” effect that helps to blur fine lines and wrinkles. Vegan formula without additives, that can cause skin irritation and allergies (such as fragrance, parabens, synthetic dye, nanoparticles, mineral oil, talc or synthetic minerals as bismuth oxychloride).

- With natural SPF 15, it protects from the harmful UV rays, wind and free radicals, thus helps to reduce the signs of ageing skin.
- Hypoallergenic, chemical free, does not clog skin pores.
- Has anti-inflammatory properties which is ideal for skin conditions like acne, breakouts, rosacea, eczema and etc, thus gives the skin the boost it needs to repair itself.
- Bacteria cannot survive in mineral make-up as pure minerals have anti-bacterial properties and thus are less prone to get contaminated.
- Mineral make-up is widely recommended by plastic surgeons and dermatologists as it is hypoallergenic and thus can be used even after surgery, microdermabrasion and chemical peeling.

**INGREDIENTS:** Mica, +/- CI77891, CI77491, CI77492, CI77499, CI77007.

Zenz mineral make-up is in compliance to EU Cosmetic Regulation 1223/2009.

Made in UK.

### Usage & tips

#### USE OF BRONZER

For best result use Zenz kabuki brush. Shake some powder into the lid and run the brush around in it. Then tap the brush lightly on the jar rim so the minerals are distributed evenly on the brush. Apply the minerals to the skin using light circular movements along the hairline, down the forehead, on the cheekbones, the temples and down the sides, over the eyebrows, a tiny bit in the middle of the chin and on the nose. Add a little at the jawline and pull the colour down on the neck. All transitions must be blended into thoroughly, providing a natural and beautiful result.

#### TIPS

1. Do not forget ears, neck and cleavage, if you have piled your hair up or have a low neckline.

#### USE OF BLUSH

For best result use Zenz flat powder brush. Shake some powder into the lid and run the brush around in it. Then tap the brush lightly on the jar rim so the minerals are distributed evenly on the brush. Apply the minerals to the skin using light circular movements on the cheekbones. Repeat until desired effect is achieved.

#### TIPS

1. Smile and apply the blush to the apples of your cheeks, sweeping along the cheekbone to the hairline. This prevents you from getting your blush too low!
2. Apply blush to cheeks, forehead, chin and tip of your nose to create a "sun kissed" look.
3. Use your blush shade as a lip colour. Dip a lip balm into some blush and apply to your lips!
4. Zenz mineral blush are very highly pigmented and only a few grains are needed to see great colour. Use a light hand when applying. To lighten a blush shade once it is applied, either go over it with a light layer of foundation or before application, mix it with some foundation powder to tone down the intensity.
